Laser

The **painless** way to remove unwanted hair... forever!

Pain-Free, Hair-Free™ works by using pulses of infrared diode laser energy to gradually heat the hair follicles in the subdermal layer of skin until they can no longer produce new hair. Using unique, IN-Motion™ technology and a patented DualChill™ treatment tip, the surface of your skin stays cool and comfortable. The sweeping motion also eliminates any skipped or missed spots common to other types of laser hair removal.

What you can expect

You can expect results from a series of relatively short sessions. (The actual time depends mainly on the size of the area you are having treated.) A trained doctor, nurse or laser technician performs each treatment.

Other benefits include:

- Complete coverage with no missed spots
- Fast treatment times
- Few side effects
- Return to normal activities immediately
- Safe for all skin types, including tanned skin
